COASTGIS 2021

Sustainable Coastal Planning in a Changing World

The 14th Coastal GIS Symposium for an international exchange of knowledge, ideas, and experience on how spatial data and information technologies aid marine and coastal zone managers and stakeholders in better understanding and managing coastal space and resources.

The theme "Sustainable Coastal Planning in a Changing World" refers to the challenges faced worldwide in light of sustainable development. Emphasis will be on cooperation in spatial planning between countries. The symposium aims to address recent challenges in managing our coastlines effectively and sustainably.

Abstract submission for oral and poster presentations is open until April 15. We also welcome suggestions for panel sessions!

With the generous support of:
