

Degree Programme in Construction Engineering, Campus Raseborg, Autumn 2021-Spring 2022

Courses taught in the Degree Programme in Construction Engineering (in English):

- English course, 3 ECTS, autumn 2021 (Nov-Dec)
for Construction Engineers incl. building terminology
- Traditional materials in new buildings and renovation - clay, hemp-lime and lime plaster”, 3 ECTS. The one-week online intensive course will be held in Sept. 2021.

In Swedish, but maybe possible to do English Friendly (lectures given in Swedish, written assignments translated into English etc.)

- International Construction Engineering, 5 ECTS, spring 2022 (Jan-Apr).
The student:
 - * is familiar at an international level with the professional field of construction and civil engineering, tasks and categories of employers and companies
 - * is able to work independently and take responsibility as a team member in the workplace community at an international company in the field of construction and civil engineering
 - * has ability to solve problems and find alternative solutions
 - *knows International communication and language skills, Business behavior
- (International Work-based Studies in Construction Engineering, 6-12 ECTS)
The student works at a company in the Construction Business. Might be challenging to find a company where you can do this in English.
- Technical and Physical Measurements in Buildings, 3 ECTS + Surveying Buildings and Plan for Maintenance, 3 ECTS, autumn 2021 (Nov-Dec)
Course given in Swedish. Group work. Probably possible to participate in together with students of the 3rd year.
